FutureNow and RevCord to develop revolutionary VoIP Voice Recording, Logging and Monitoring solutions

New modules would allow firms to keep track of all their calls, all the time
Leading VoIP Communications company plans to strengthen its portfolio by partnering with FutureNow
FutureNow Technologies (Pvt) Ltd. www.fnint.com, a leading worldwide provider of technology solutions, announced today that it has joined forces with RevCord in order to develop next generation VoIP solutions designed to significantly improve call logging, tracking, analysis and security.

The world is now moving towards VoIP solutions in order to improve their voice communication. It is therefore now much easier to take advantage of the digital nature of communication. The new VoIP modules under development, will allow companies to store, organize and perform content searches on their voice calls.

This has huge potential for almost all commercial industry verticals including, but not limited to; brokerage, trading, distribution, sales, insurance, banking, technical support, telemarketing and various other business sectors.

"Internal and external voice communication is the backbone of today's business", said Mian Arif Ali, Executive Director at FutureNow Technologies (Pvt) Ltd.

"When we give companies the ability to store, manage and search through their voice communication; we're essentially revolutionizing the way people will do business. We're very excited about the possibilities and the avenues that this would open for our clients".
